## FIRST THINGS FIRST

### WHAT IS UPFITTING?

Upfitting is the process of outfitting your new truck or van to create an efficient work environment. Without proper flooring, shelving, bulkhead, and ladder solutions, your work becomes more tedious and more dangerous.

This personalization helps you increase brand awareness and boost customer satisfaction by allowing you to put your best foot forward.

Cloudflare to distribute the load, saving bandwidth and speeding up access for your users.

## APPLICATIONS

# VEHICLES THAT BENEFIT FROM UPFITTING

Once your needs are analyzed, the upfit is brought to life based on the application. For example, shelving and storage can be used differently from industry to industry. Upfitting is typically a good match for cargo vans, pickup trucks, and utility trucks. Trades that benefit from these services include electricians, plumbers, pipefitters, and HVAC technicians.

## DYNAMIC CAPABILITIES

# CARGO VAN UPFITTING SERVICES

### Bulkhead

With steel, aluminum, or thermal-formed plastic between your cabin and cargo, material stays out of your front seat and windshield while keeping your cabin comfortable.

### Flooring

Plastic, composite, or wood flooring keeps your surface level and safe for movement. Composite flooring also protects your van from chemicals for extended longevity.

### Shelving

Steel or aluminum shelving helps you organize your van and increase visibility for tools and equipment.

### LED Lighting

Strobe, safety, and area lighting helps you work into the evening hours or in an emergency situation.

### Ladder Racks

If your line of work involves ladders, a hydraulic rack can maintain safety and access from the street. Safari racks can also haul large sheets of material.

## CUSTOMIZE YOUR EXTERIOR GRAPHIC SERVICES

### Graphic Design

If your business has yet to distinguish its brand and logo, design services can bring your ideas to life.

### Lettering

Displaying your important contact information is perfect for a classic, minimalist solution.

### Full & Partial Wraps

Transform your van with branded style or incorporate intricate designs and photos on your van's exterior.

## MANAGING FLEETS

# HOW THESE SERVICES BENEFIT FLEET MANAGEMENT

Finding quality upfitting contacts can be difficult. For fleet management, reliable services are critical for providing top-tier products to clients. Consistency is also important, as your services are elevated by the van's performance.

Partner with TNT to eliminate stress and guesswork. We communicate directly with dealerships to give your fleet a consistent upfitting solution. As a turnkey provider with in-depth expertise and service proximity, we also minimize wait times.

## SUSTAINABLE & DEPENDABLE SOLUTIONS FOR ELECTRIC VEHICLES

As a shift toward greener solutions takes the auto world by storm, upfitting is the answer to EV limitations like weight. Aluminum shelves and other accessories are sturdy without burdening your van with heavy material. This helps your new EV carry your business wherever you need it to.

### EXPERT SERVICES WHY CHOOSE TNT?

#### Trade Expertise

Our exposure to plumbing, pipefitting, and welding and seeing the way tradesmen use their vehicles gives us a unique understanding of your needs.

#### Regional Presence With a National Reach

Our upfitting services are carried out here in Illinois but extend to California, Michigan, and Mississippi.

#### Work-Ready Services

When you select TNT for your cargo van upfitting, our team completes everything you need. From shelves to lighting to graphic design, we transform your work vehicle with pride.
